

BUCKS MUSEUM

February Half Term
15 – 23 February 2025

An action-packed week of fun and discovery!

Light Fantastic – the science of optics

Hands-on science is back at the museum with another brilliant exhibition from Science Projects Ltd. This time exhibits explore the science of optics – the way we see things and how light behaves. Have fun experimenting with lenses, mirrors, reflections, lightning and luminosity.

Discover eye-boggling and brain-baffling exhibits! Investigate optical illusions and find out how images merge into moving pictures and how your brain influences what you see.

The Light Fantastic science exhibits will be in the exhibition space where you will also find displayed the wonderful entries and competition winners in our Bucks Photography Exhibition.

Explore, discover, experiment!

- ✦ Get ready for a paws-itively fun journey on our museum Animal Trail!
- ✦ Discover the soothing magic of our Dark Den sensory room.
- ✦ Help bring our Animal Mural to life—add your creative touch today!

This February half term, join us for Light fantastic exhibition, take part in exciting family-friendly activities and craft, plus Play, Discover and Learn in the Roald Dahl Children's Gallery!
